

Elco e power hybrid system

How does the Elco hybrid system work?

The Elco hybrid system integrates the Elco electric motor, battery bank, and appropriately sized generator to keep the battery bank charged. The addition of an appropriately sized generator significantly increases the boat's range over using a diesel motor.

What is an Elco hybrid motor?

Elco offers motor solutions from 6 - 100 horsepower for a wide range of displacement and semi displacement vessels. The hybrid system integrates the Elco electric motor, battery bank, and appropriately sized generator to keep the battery bank charged.

What makes Elco a reliable marine propulsion system?

Elco's marine propulsion systems are based on super reliable AC induction motors. The AC motor offers unequaled reliability, simplicity of design, efficiency, and ultimately lower cost.

Is the Elco AC Motor reliable and efficient?

The Elco AC Motor is reliable and efficient, with an efficiency of 85-92%, which is over 30% more efficient than a DC motor and over 40-50% more efficient than a combustion motor. You really have to experience it to believe it; schedule a demo today.

How does Elco dash work?

Elco's motor controllers and Bluetooth connectivity integrates, with a quick glance, all important motor and battery information into any boating environment through the downloadable Elco-Dash app for phones, watches or tablets. *1-4 hours of boating are typical at various speeds with suggested Battery Amp Hours (Ah).

Are Elco motor controllers suitable for sailboats?

They are suitable for sailboats, Elco's motor controllers and Bluetooth connectivity integrates, with a quick glance, all important motor and battery information into any boating environment through the downloadable Elco-Dash app for phones, watches or tablets.

The Elco EP Motor is pure torque, unlike a diesel that uses belts, pulleys, and many other moving parts. The diesel motors moving parts create losses in torque and on average, only 40%-60% of the power created is actually used to propel your vessel. -Further, the motor only reaches full torque at one particular point in the torque curve.

Elco Motor Yachts EP-100 Electric Marine Motor System: Complete 200 HP Electric Marine Propulsion Hybrid Electric Marine Propulsion System for yachts from 50 feet to 85 feet or more with lithium marine batteries. Economical, Powerful and Efficient Long-Lasting ... When purchasing an Elco E-Power System,

Elco e power hybrid system

you're not just receiving a motor, you're ...

Elco's Pure Electric propulsion system doesn't use gas, diesel, or oil. Rated for 50,000 hours, the Elco EP electric motors are pure, green energy. Hit enter to search or ESC to close. 0 The diesel motors moving parts create losses in torque and on average, only 40%-60% of the power created is actually used to propel your vessel ...

Elco Motor Yachts EP-40 40 Horsepower Electric Marine Motor: Complete Electric Marine Propulsion and Hybrid Electric Marine Propulsion Systems from 6 hp to 125 hp diesel engine ...

New Legend e36 HYBRID can be seen at the PSP Southampton Boat Show, Mayflower Park SOUTHAMPTON, UK - September 16, 2011- The new Legend e36 HYBRID features the all-new Elco E Power hybrid system, featuring the new Elco EP4000 AC electric motor. The E Power system includes an integrated network of high performance recharging options with a

When purchasing an Elco E-Power System, you're not just receiving a motor, you're purchasing all the essential components to power the vessel with electric propulsion and we provide the Lithionics Battery

Elco e power hybrid system

lithium-ion batteries. Hybrid electric systems can offer extended range and are optional. Hybrid details below...

The Hunter 27e with the Elco E Power system is an upgrade to the award-winning Elco electric-powered Hunter 27e sailboat. To learn more, arrange an appointment or interview, please contact Kevin M. Kearns at +1 (949) 394-2216, (877) 411-3526, or via e-mail at kkearns@elcomotoryachts .

The E Power system includes an integrated network of high performance recharging options with a range of over 800 nautical miles at five knots cruising speed at a cost of eight cents per nautical mile when under battery power only. The Legend e36 HYBRID follows the introduction of the award-winning Elco electric-powered Legend e27 sailboat.

Battery Energy Storage Systems (BESS) built on state-of-the-art-technology are modular solutions in terms of output power and energy. Variety of operation modes and flexibility to connect to any voltage level, makes Merus BESS a preferred solution for complete electricity system value chain starting from the generation.

The Elco EP-70 is a high power level electric marine propulsion system - perfect for boats 38 feet to 56 feet. Combining affordability and environmentally clean and efficient marine propulsion. With direct drive compatibility, it is an easy refit or an even ...

When purchasing an Elco E-Power System, all the essential accessories for electric propulsion, including the batteries and chargers are available. This includes your choice of throttle, battery monitor, batteries, charger, and battery connection kit for "plug & play" installation. ... E-Power Electric Hybrid options include generators and ...
