Wide Applications: This multimeter can be widely used by PV panel manufacturers, PV panel distributors, PV panel installers, PV panel users and PV panel fans. Note: There are two different types of multimeter for you to choose: EL400B/EY800W. The difference between these two types is the power of EL400B is 0.1-400W, the power of EY800W is 5-800W.

Quick testing of solar PV panels with one instrument Voltage measuring range is 12 - 60v Current measuring range is 0 - 35A Power measuring range is 5 - 800W Auto and Manual MPPT detection Meter is powered by panel under test Now with backlit LCD display

Additionally, our solar panel multimeter can help you determine the best angle or position for your solar panels, allowing you to optimize their performance. With multi-protection features such as over-voltage, over-temperature, over-current, and over-rated power protection, you can use this tool with peace of mind, knowing that your safety is ...
