

Conmeq developed from scratch an electric loader that makes physical work such as paving or demolition jobs much easier. To do this, in 2019 Conmeq sought cooperation with ELEO, which makes battery systems for loaders. ELEO will supply at least one thousand battery systems over the next three years.

The ELEO battery is a simple black box that comes in five different sizes. The systems are modular and the three parameters - energy, voltage and power - can be easily adjusted to meet the customer's needs. Verkaik adds: "Our system is suitable for a 600 V excavator, as well as a smaller 50 V vehicle."

Eleo Technologies has rolled out a fresh lineup of battery packs designed for the off-highway construction market. Founded in 2017, Netherlands-based Eleo's new batteries are designed for low ...

On Thursday January 26 th, 2023, Eleo will open its new battery factory in Helmond, the Netherlands. The official opening will be performed by His Majesty the King of the Netherlands. Eleo designs and manufactures advanced battery systems that meet the specific needs of industrial applications, such as construction and agricultural equipment and ...

The company brought the first battery systems to market in 2020 and now wants to expand across Europe. With a new name, ELEO, and a multi-million euros investment from the Lumipol ...

Eleo battery packs also feature a flexible, modular design that accommodates space constraints, with both horizontal and vertical placement options. These battery packs offer a scalable voltage range from 50V to 720V and a maximum continuous power output of up to 90 kW, providing robust power potential and versatility for a wide range of ...

OSAKA, Japan, and HELMOND, the Netherlands - April 4th, 2022 - Yanmar Holdings Co., Ltd., a privately held multi-billion dollar multinational company headquartered in Osaka, Japan, today officially announced it has acquired a majority share in ELEO Technologies B.V., a fast-growing battery technology company based in Helmond, the Netherlands. By ...

ELEO, the manufacturer of advanced battery systems, has announced plans to expand considerably with a new battery production plant at the Automotive Campus in Helmond. In the new facility, the annual battery production capacity increases tenfold to 500MWh - equivalent to approximately 10,000 battery packs.

Eleo battery packs also feature a flexible, modular design that accommodates space constraints, with both horizontal and vertical placement options. These battery packs offer a scalable voltage range from 50V to 720V and a maximum continuous power output of up to 330 kW, providing robust power potential and versatility for a wide range of ...

Eleo battery

We're helping the world work towards net-zero, by making off-highway EV battery packs a practical alternative to internal combustion engines. Our mission is to enable widespread ...

About ELEO. Founded in 2017, ELEO Technologies B.V. is a fast-growing battery technology company based in Helmond, the Netherlands. Since its inception, ELEO has been committed to the mission of making high quality battery systems accessible to a wide variety of industrial applications.

Founded in 2017, ELEO Technologies B.V. is a fast-growing battery technology company based in Helmond, the Netherlands. Since its inception, ELEO has been committed to the mission of making high quality battery systems accessible to a wide variety of industrial applications.

Eleo | 10.235 Follower:innen auf LinkedIn. Eleo, a Yanmar company, manufactures a full range of battery packs, specifically designed for off-highway applications. | Eleo is the off-highway EV battery pack specialist, our battery packs offer versatile configurations for simple, practical, and fast integration. We're helping the world work towards net-zero, by making off-highway EV ...

ELEO's founders Bas Verkaik, Jeroen Bleker and Bram van Diggelen, will maintain their focus on further strengthening the company's technology and accelerating business growth. The founders will be joined by key executives from Yanmar to form the company's management board.

With that, the battery system was ready for the market. Verkaik: "Last year we used the batteries at over twenty organizations in their applications." Earlier this year, the company introduced a new name: ELEO. To mark its readiness to become a leading European manufacturer of advanced battery systems, Verkaik points out.

Helmond-based startup Eleo has developed a solution. Electrification of heavy machinery such as excavators and combine harvesters is still in its infancy, largely because of the complexity and cost of the required battery packs.

Eleo's battery packs are rigorously tested to withstand these challenges, ensuring consistent high-performance day in and day out. Modular Design for Flexibility and Scalability. The Eleo packs boast a unique modular design that caters to the diverse space constraints of off-highway equipment. With both horizontal and vertical placement ...
