

What is the iShares energy storage & materials ETF?

The iShares Energy Storage & Materials ETF (the "Fund") seeks to track the investment results of an index composed of U.S. and non-U.S. companies involved in energy storage solutions aiming to support the transition to a low-carbon economy, including hydrogen, fuel cells and batteries.

What are some interesting energy storage ETFs?

Another interesting energy storage ETF is GRID, which is focused on alternative energy infrastructure companies such as power management company Eaton Corp. (ETN), industrial conglomerate Johnson Controls International PLC (JCI), and electronics and automation pioneer Abb Ltd. (ABB).

What are ETFs & how do they work?

ETFs are funds that trade like other publicly traded securities. The Fund is designed to track an index. Similar to shares of an index mutual fund, each share of the Fund represents an ownership interest in an underlying portfolio of securities and other instruments intended to track a market index.

Which energy storage stocks are a good investment?

Albemarle is the top holding, followed by Tesla, so if you can't decide from the previous stocks, this fund is a good one-stop investment to play the pending energy storage boom. With more than \$1 billion under management and about 60 components, this First Trust fund is another interesting and diversified way to play energy storage.

What is the energy storage solutions sector?

Companies in the energy storage solutions sector, including, but not limited to, battery, fuel cell, and hydrogen companies, may depend largely on the availability of hydrogen gas, certain third-party key suppliers for components in their products, and a small number of customers for a significant portion of their business.

Is the fund an ETF?

The Fund is an ETF. Individual shares of the Fund may only be bought and sold in the secondary market through a broker-dealer. Because ETF shares trade at market prices rather than at NAV, shares may trade at a price greater than NAV (a premium) or less than NAV (a discount).

6 ¶; The iShares Energy Storage & Materials ETF (IBAT) is an exchange-traded fund that mostly invests in stocks based on a particular theme. The fund tracks a price-weighted index of companies involved in energy storage solutions around the globe.
