One of the easiest options to keep your swimming pool clean is to add a salt water generator. A generator is placed in the pool which uses the 99.3% pure pool salt and water to make chlorine bubbles. This makes the water friendly on the skin and eliminates the rather powerful and unhealthy chlorine smell.

Thermal storage materials are significant for energy management and therefore have gained wide applications in our daily life. For instance, Tian et al. [1] reviewed different thermal storage materials which could be used in the solar collectors. Xu et al. [2] summarized different approaches in which thermal storage materials were applied in the solar thermal ...
