

Energy storage industry mergers and acquisitions

Will industrial reconfiguration drive M&A activity in the energy sector?

Industrial reconfiguration amid geopolitical shifts and energy transition will drive M&A activity in the energy, utilities, and resources sectors during the second half of 2024.

Are mega deals underpinning continued corporate consolidation?

At a glance we are seeing: In the mining and metals sector, consolidation and deals to secure supply of critical minerals are expected to continue. In oil and gas, mega deals are underpinning continued corporate consolidation, as companies diversify asset portfolios and seek synergies.

How can a joint venture accelerate an energy transition strategy?

Evolve the joint venture playbook to accelerate an energy transition strategy. This is a historic area of strength for many energy and natural resources companies as they've used joint ventures to partner in the development of oil and gas fields or large petrochemical complexes, often with state-owned enterprises.

Are energy & natural resources companies rebalancing their carbon portfolio?

Energy & Natural Resources Report Many energy and natural resources companies are turning to acquisitions to rebalance their carbon portfolio and to green their operations. Despite low deal activity in 2021, more companies are turning to M&A to acquire lower-carbon assets, particularly in renewable power generation.

Will energy companies emerge as leaders?

In their effort to rely on deals to deliver the energy transition, some companies will emerge as leaders. Here's how M&A practitioners in energy and natural resources can boost the odds of success. Take an activist approach to portfolio management.

Why do companies invest in green energy?

More companies are using deals to green existing operations and strengthen ESG assets; build green energy hubs and an integrated value chain to assist the energy transition; reshape business models; and invest in start-ups to acquire disruptive technology.
