An Energy Storage Module (ESM) is a packaged solution that stores energy for use later. The energy is usually stored in batteries for specific energy demands or to effectively optimize cost. ESM can store electrical energy and supply it to designated loads as a primary or supplementary source. Moreover, it provides a stable and continuous power ...

Abstract: This paper presents a high-efficiency compact ($0.016\lambda_{0}^2$) textile-integrated energy harvesting and storage module for RF power transfer. A flexible 50 μm -thick coplanar waveguide rectenna filament is integrated with a spray-coated supercapacitor to realize an "e-textile" energy supply module.

In particular, the energy storage module is fully made of biodegradable materials while achieving high electrochemical performance (including a high capacitance of 93.5 mF cm^{-2} and a high output voltage of 1.3 V), and its charge storage mechanism is further revealed by comprehensive characterizations. Detailed investigations of the ...
