

Are energy storage codes & standards needed?

Discussions with industry professionals indicate a significant need for standards..." [1,p. 30]. Under this strategic driver,a portion of DOE-funded energy storage research and development (R&D) is directed to actively work with industry to fill energy storage Codes &Standards (C&S) gaps.

What is the energy storage protocol?

The protocol is serving as a resource for development of U.S. standards and has been formatted for consideration by IEC Technical Committee 120 on energy storage systems. Without this document,committees developing standards would have to start from scratch. WHAT'S NEXT FOR PERFORMANCE?

Does industry need standards for energy storage?

As cited in the DOE OE ES Program Plan,"Industry requires specifications of standardsfor characterizing the performance of energy storage under grid conditions and for modeling behavior. Discussions with industry pro-fessionals indicate a significant need for standards ..." [1,p. 30].

What is an energy system protocol?

As a protocol or pre-standard,the ability to determine system performance as desired by energy systems consumers and driven by energy systems producers is a reality. The protocol is serving as a resource for development of U.S. standards and has been formatted for consideration by IEC Technical Committee 120 on energy storage systems.

What is the UL 9540 standard for energy storage systems?

For ESS,the standard is UL 9540,Standard for Energy Storage Systems and Equipment. UL 9540 covers the complete ESS,including battery system,power conversion system (PCS),and energy storage man-agement system (ESMS). Each of these components must be qualified to its own standard:

Do energy storage systems need to be certified?

U.S. fire and electrical codes require that energy storage systems be listed,meaning the product must be tested by a Nationally Recognized Testing Laboratory (a private-sector organization recognized by the Occupational Safety and Health Administration) and certified to meet consensus-based test standards.
