6. Use Cases Residential Energy Storage BESS can be used to store energy from residential solar panels for use during times when the panels are not producing enough energy. Grid Stabilization BESS can be used to store excess energy during times of low demand and release it back into the grid during peak demand to help stabilize the grid and prevent blackouts.

2. Introduction A flywheel, in essence is a mechanical battery - simply a mass rotating about an axis. Flywheels store energy mechanically in the form of kinetic energy. They take an electrical input to accelerate the rotor up to speed by using the built-in motor, and return the electrical energy by using this same motor as a generator. Flywheels are one of the most ...
