China is currently in the early stage of commercializing energy storage. As of 2017, the cumulative installed capacity of energy storage in China was 28.9 GW [5], accounting for only 1.6% of the total power generating capacity (1777 GW [6]), which is still far below the goal set by the State Grid of China (i.e., 4%-5% by 2020) [7]. Among them, Pumped Hydro Energy ...
