

Ericsson company sola

When did Ericsson become a company?

Since the start in 1876, Ericsson had been active in making both phones and networks. In October 2001, Ericsson's cell phone division merged with the Japanese home electronics firm Sony and formed Sony Ericsson. The competition had become much tougher in the cell phone sector, and Ericsson could no longer rely solely on its own technical expertise.

What happened to Sony Ericsson?

In October 2001, Ericsson's cell phone division merged with the Japanese home electronics firm Sony and formed Sony Ericsson. The competition had become much tougher in the cell phone sector, and Ericsson could no longer rely solely on its own technical expertise. After NMT (1G) came GSM (2G), enabling even more widespread use of mobile telephony.

Where is Ericsson headquartered?

Telefonaktiebolaget LM Ericsson (publ) was founded in 1876 and is headquartered in Stockholm, Sweden. Shares of Ericsson (ERIC) have hit a two-year high after the company reported upbeat third quarter results and saw sales in North America grow 55% year over year.

Who is Ericsson?

Ericsson is the leading provider of 5G network equipment in the US. We are committed to bringing the benefits of secure and sustainable 5G networks to the US, boosting the economy and ensuring broadband access for all.

Why is Ericsson a global leader in ICT solutions?

Over the past 140 years, Ericsson has been a global leader in ICT solutions. From manufacturing some of the first telephones, to managing networks that process 40% of the world's data, we have a long history of shaping how the world communicates. © Telefonaktiebolaget LM Ericsson and Centre for Business History

Will Ericsson partner with Canada in 2023?

The partnership between Ericsson and the federal government, announced in April 2023, is meant to put Canada at the "forefront of global development in next-generation communications technologies," the company said last year.

Rolling out 5G without increasing energy consumption.
