Sunry monocrystalline solar panel ensures higher module efficiency and higher power output. Max. efficiency reaches to 21.55%. ... with higher GEL content to provide excellent encapsulation and protect ...

The module has an impressive 610 Watt output and uses advanced bifacial technology to enable energy extraction from both sides of the module. The bifacial design and the rectangular N-TOPCon technology give the new module a range of advantages, including increased performance, maximum efficiency and improved performance in poor light conditions.

The LONGi LR7-72HTH-610M solar panel is a high-performance monocrystalline module from LONGi's Hi-MO 7 series, designed for both residential and commercial applications. With a peak power output of 610W and bifacial cell technology, this panel achieves an impressive efficiency of 22.6%, allowing for high energy yields even in challenging conditions.Key Features: Maximum ...

PV Panel Longi 610W Bifacial mono LR7-72HGD-610M. LONGi Hi-MO 7 is a new Longi product line

based on HPBC cell technology. The Hi-MO 7 is significantly upgraded over earlier models in terms of performance, reliability, aesthetics and intelligent output optimization thanks to the high performance HPBC cells.

Unique design: The 610w monocrystalline module adopts a unique approach in the design process, which puts solar modules in a leading position in the performance competition. Its clever circuit design ensures that the module maintains a lower temperature during operation, effectively avoiding the occurrence of hot spots., and thus improves the ...
