

Fiber power backup

Do I need backup power for my home internet connection?

You'll need backup power for your home internet connection, but there's no point if your ISP (Internet Service Provider) isn't doing the same thing. It's a good idea to contact your ISP and ask them whether their service stays up during power outages. If not, you may want to consider a different ISP.

What is a good ups for a router & modem?

If you're on a tight budget, the Amazon Basics Standby UPS 800VA is an affordable UPS with the battery and run time of a more expensive model: It can keep a typical router and modem running for up to one and a half hours.
