Is fidelity a diversified fund?

Fidelity says, "The fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund; thus changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund."

The underlying index is designed to provide exposure to publicly traded companies that produce energy from renewable sources including wind, solar, hydroelectric, geothermal, and biofuels (including publicly traded companies that are formed to own operating assets that produce defined cash flows. The fund is non-diversified. [Learn More](#)
