

Will there be a battery storage unit in Finland?

The construction for the battery storage unit is on-going. Customer Manager Antero Reilander from Fingrid says that Neoen inquired - via a consultant - in October 2019, if there would be a suitable plot for battery storage facility somewhere in Finland.

Is Finland doing sand batteries Big?

Finland is doing sand batteries big. Polar Night Energy already showed off an early commercialized version of a sand battery in Kankaanpää; in 2022, but a new sand battery 10 times that size is about to fully rid the town of Pornainen, Finland of its need for oil-based energy.

Is Yllikkälä; the biggest battery storage project in Europe?

"Yllikkälä; is a key project for our company, being the largest of its kind for us in Europe. It is a very good complement to our renewable project developments in Finland," says Prot. Antero Reilander comments that while there have been other battery storage projects in Finland, this one is the biggest - by far.

Is Yllikkälä; a suitable plot for a Neoen battery storage facility?

Customer Manager Antero Reilander from Fingrid says that Neoen inquired - via a consultant - in October 2019, if there would be a suitable plot for battery storage facility somewhere in Finland. "We made a survey of the entire country and quickly focused on Yllikkälä; which seemed like a really good fit for Neoen," Reilander looks back.

Why has Finland halted gas & electricity supplies?

It has the longest Russian border in the EU and Moscow has now halted gas and electricity supplies in the wake of Finland's decision to join NATO. Concerns over sources of heat and light, especially with the long, cold Finnish winter on the horizon are preoccupying politicians and citizens alike.

Is an energy storage system safe?

The energy storage system is safe because inert silica sand is used as storage media, making it an ideal candidate for massive, long duration energy storage. ENDURING systems have no particular siting constraints and can be located anywhere in the country.

Finnish researchers have installed the world's first fully working "sand battery" which can store green power for months at a time. The developers say this could solve the problem of year ...

Finnish companies Polar Night Energy and Vatajankoski have built the world's first operational "sand battery", which provides a low-cost and low-emissions way to store ...

The world's first commercial sand battery system is now in operation in Western Finland. Polar Night Energy.

This is a thermal energy storage system, effectively built around a ...

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, ...

A study published by a team of international researchers last month found that gravity batteries in decommissioned mines could offer a cost-effective, long-term solution for ...

In cooperation with the local Finnish district heating company Loviisan Lämpö, Polar Night Energy will develop a 1-megawatt sand battery capable of storing up to 100 ...
