

Finland energy storage projects

Is a battery storage project a good investment in Finland?

It is a very good complement to our renewable project developments in Finland," says Prot. Antero Reilander comments that while there have been other battery storage projects in Finland, this one is the biggest - by far. Despite the size of the undertaking, the project has proceeded very smoothly indeed.

Is Yllikkälä the biggest battery storage project in Europe?

"Yllikkälä is a key project for our company, being the largest of its kind for us in Europe. It is a very good complement to our renewable project developments in Finland," says Prot. Antero Reilander comments that while there have been other battery storage projects in Finland, this one is the biggest - by far.

Is Yllikkälä a suitable plot for a Neoen battery storage facility?

Customer Manager Antero Reilander from Fingrid says that Neoen inquired - via a consultant - in October 2019, if there would be a suitable plot for a battery storage facility somewhere in Finland. "We made a survey of the entire country and quickly focused on Yllikkälä which seemed like a really good fit for Neoen," Reilander looks back.

Why is Yllikkälä a key project for Neoen?

Following the development of the Hedet and Mutkalampi wind farms, Neoen is making yet another big push in the renewable energy market with the addition of the new battery storage unit. "Yllikkälä is a key project for our company, being the largest of its kind for us in Europe.

In the energy storage team, we work with a large variety of different energy storage technologies to support the transition to renewable energy production. ... Hyper-sphere is an Academy of Finland project in collaboration with Prof. Rodrigo Serna at the School of Chemical Engineering. In this project, we develop new methods for processing end ...

UB Renewable Energy Fund (AIF) has acquired a 30MW/60MWh BESS project in Finland on which it will start construction in Spring 2025. Skip to content. Solar Media. ... Aquila Clean Energy EMEA started building a 50MW BESS, while fellow developer MW Storage announced two new energy storage projects totalling 40MW, covered by Energy-Storage.news.

The energy storage market in Finland is being driven by growing wind generation and the limitations of its existing fleet of pumped hydro storage, according to local system integrator Merus Power speaking to Energy-Storage.news at the Energy Storage Summit EU in March. Projects are mainly providing ancillary services for now, and the duration ...

The industrial-scale storage unit in Pornainen, southern Finland, will be the world's biggest sand battery when it comes online within a year. Capable of storing 100 MWh ...

STOREtrack is Europe's leading database of storage projects, helping you keep your finger on the pulse of the European energy storage markets. The database tracks the deployment of storage across 28 countries, detailing the companies involved in each project and their role, as well as project technologies, milestones, segments and technical ...

Sustainable Energy Solutions Sweden Holding ABSustainable Energy Solutions Sweden Holding AB (publ) ("SENS" or the "Company") today announces that the Company has acquired 100% of two sub-projects within the energy storage project in Pyhäjärvi, Finland. The acquisition includes an 85 MW battery ene...

A seasonal thermal energy storage will be built in Vantaa, which is Finland's fourth largest city neighboring the capital of Helsinki. When completed, the seasonal energy ...

Global private equity firm Ardian has enlisted power solutions firm Merus Power for its first BESS project, a 38MW/40MWh system in Finland. Skip to content. Solar Media. ... Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 20-21 February 2024. This year it is moving to a larger venue ...

Finnish companies Polar Night Energy and Vatajankoski have built the world's first operational "sand battery", which provides a low-cost and low-emissions way to store ...

SENS acquires battery and underground pumped storage project in Finland. ... Holding AB (publ) ("SENS" or the "Company") today announces that the Company has acquired 100% of two sub-projects within the energy storage project in Pyhäjärvi, Finland. The acquisition includes an 85 MW battery energy storage system (BESS) and a 75 MW ...

Energy-Storage.news interviewed Merus and eNordic about the project whilst at Solar Media's Energy Storage Summit EU 2024 in London in February (Premium access). Capalo AI will use its Zeus VPP platform to optimise the BESS project's charge and discharge in Finland's ancillary services markets - FFR, FCR- D, FCR-N, aFRR, mFRR - and ...

The project aims to investigate the potential of different energy storage technologies in Finland. These should be able to store electrical energy and use it to produce electricity, heat, or different ... After having assessed potential storage technologies, the project goes more in depth into a couple of them, namely Solid Mass Gravitational ...

Finnish investment manager Innovestor has initiated a EUR20 million energy storage project focusing on decentralized systems installed in commercial properties across Finland. This effort aims to address fluctuations in clean energy production by utilizing "behind-the-meter" battery systems, which store solar energy on-site.

Also dozens of other hydrogen-related projects are underway in Finland, according to data from H2 Cluster, an industry-led cluster of almost 100 companies. The activity should delight the central government, given its target of producing 14 per cent of hydrogen in the EU. ... Teraloop, meanwhile, has been awarded for its modular kinetic energy ...

Finland has set targets to reduce greenhouse gas emissions by at least 60 % by 2030 compared to 1990 levels and for the renewable energy share of final energy consumption to be at least 51 % by 2030 [1] as for use in energy production is to be discontinued by 2029, and the use of fossil fuel oil for space heating is to be phased out by the beginning of the 2030s.

- This is our first battery energy storage project in Finland and we are happy to sell it to L& G NTR Clean Power Fund. The project will make a valuable contribution to stabilize the grid as the demands shift following a rapid electrification and transition to a fossil free-energy system, says Paul Stormoen, CEO, OX2. ...

The Uusnivala project is just shy of being largest BESS project being built currently in the Nordic country, which at present would be a 56.4MW/112.9MWh system from IPP Neoen (Premium access article).OX2 didn't reveal when the project is expected to come online. The BESS will participate in Finland's ancillary service and wholesale energy markets, being ...

1 · Testing of the Sand Battery will begin during the winter, with commissioning set for 2025. In 2022, Polar Night Energy switched on the world's first commercial sand-based, high-temperature heat storage system in the Finnish city of Kankaanpää, with 100 kW of power ...

The first commercial sand-based thermal energy storage system in the world has started operating in Finland, developed by Polar Night Energy. Polar Night Energy's system, ...

Wilfried Karl, CEO at MW Storage, commented: "Our latest project in Finland builds on our experience of deploying and operating several of our earlier energy storage projects in Europe, with the ...

OX2, a solar and energy storage project developer, signed an agreement to sell the ready-to-build 50 MW/110 MWh Uusnivala battery energy storage project to the L& G NTR Clean Power Fund, which will manage the project's construction. ... Finland, is located near a connection point in an area with high wind power penetration. It will provide ...

- This is our first battery energy storage project in Finland and we are happy to sell it to L& G NTR Clean Power Fund. The project will make a valuable contribution to stabilize the grid as the demands shift following a rapid electrification and transition to a fossil free-energy system, says Paul Stormoen, CEO, OX2. - With longstanding experience and expertise in developing and ...

That's according to executives from Merus Power speaking to Energy-Storage.news at Energy Storage

Finland energy storage projects

Summit last week. ... Battery storage projects in Finland are mainly focused on an ancillary services market of around 400MW, with around 100MW of operational batteries playing in the market today. Pumped hydro has in the past dominated this ...

The new 30 MW energy storage plant - with a storage capacity of 30 MWh - is located in Yllikkälä, close to the city of Lappeenranta in Southeast Finland. Known as Yllikkälä, ...

The project is the successor to a 30MW/30MWh BESS Neoen already operates in Finland. IPP Neoen has started construction on a 2-hour 56.4MW/112.9MWh BESS in Finland, in the context of market dynamics which optimiser Capalo AI explained to Energy-Storage.news.. The Paris-headquartered independent power producer (IPP) announced construction on the ...

We are building a seasonal thermal energy storage facility in Vantaa, Finland. Our seasonal thermal energy storage is called Varanto. When completed in 2028, it will be the largest in the world by all standards (1,1 million cubic meters and 90 GWh). ... The project, valued at around 200 million euros, is financed by Vantaa Energy, but has ...

Energy-Storage.news recently heard from optimiser Capalo AI that the sector in Finland was moving to 2-hours due to changing revenues and regulations, exemplified by a 2-hour, 112.9MWh project which IPP Neoen started building in January, Finland's largest.
