

Edinburgh-based startup Gravitricity is set to turn one of Europe's deepest mines into the continent's first-ever gravity energy storage system.. The gravity tech uses massive weights that are ...

STOREtrack is Europe's leading database of storage projects, helping you keep your finger on the pulse of the European energy storage markets. The database tracks the deployment of storage across 28 countries, detailing the companies involved in each project and their role, as well as project technologies, milestones, segments and technical ...

The world's first commercial sand battery system is now in operation in Western Finland. Polar Night Energy. This is a thermal energy storage system, effectively built around a ...

This is a thermal energy storage system, effectively built around a big, insulated steel tank - around 4 metres (13.1 ft) wide and 7 metres (23 ft) high - full of plain old sand.

The industrial-scale storage unit in Pornainen, southern Finland, will be the world's biggest sand battery when it comes online within a year. Capable of storing 100 MWh ...

Finland has a good chance of being a European champion of the energy transition by 2040. The opportunities are much greater than the obstacles on the path to a bright energy future. Read more about how we can create a prosperous energy future for Finland.

Finnish researchers have installed the world's first fully working "sand battery" which can store green power for months at a time. The developers say this could solve the problem of year ...

Finland has also made a noteworthy shift toward clean energy. More than 90 per cent of the energy it generates is already carbon neutral; yet, it has set its sights on doubling clean energy production to build a more robust and sustainable foundation for economic growth. The building blocks are being put in place across Finland.

Developers SENS and Callio have revealed a hybrid project in Finland which could combine a battery energy storage system (BESS), pumped hydro energy storage and solar PV technology. ... The pumped hydro energy storage (PHES) unit would be a 75MW/530MWh, 7-hour system built underground though a timeline for its development, construction or ...

Developer ib vogt has sold rights to a large-scale 1-hour duration battery storage project in Finland, Europe, to investor Renewable Power Capital (RPC). The sale of the 50MW ...

In late January, Energy-Storage.news covered French developer Neoen's announcement of Yllikkälä Power Reserve Two (YPR2), a 56.4MW/112.9MWh BESS set to be Finland - and the Nordics" - biggest project to date by megawatt-hours. That project will be located close to Finland's first large-scale BESS, a 30MW/30MWh also by Neoen.

Hitachi ABB Power Grids, formed by combining the capabilities of the Japanese and Swiss technology and engineering groups Hitachi and ABB, has deployed more than 600MW of battery storage worldwide. Energy-Storage.news has reported on energy storage projects and activities by the company around the world with varied scope of technologies and ...

The battery stores 8 MWh of thermal energy when full. When energy demand rises, the battery discharges about 200 kW of power through the heat-exchange pipes: that's enough to provide heating and ...

The energy storage market in Finland is being driven by growing wind generation and the limitations of its existing fleet of pumped hydro storage, according to local system integrator Merus Power speaking to Energy-Storage.news at ...

14 · From ESS News. Finnish startup Polar Night Energy has announced that construction is proceeding according to plan on its thermal energy sand-based storage system ...

Energy storage news. Tesla EV battery packs repurposed into energy storage systems in Finland and California. Read more. The driven. Finnish start-up is turning Tesla EV batteries into storage systems. Read more. Tech . Breathing new life into spent Tesla EV batteries, Cactus raises EUR2.5 million to meet growing customer demand.

A few large-scale projects have been added to wind farms, like ones for power generators Ilmatar Energy and EPV Energy reported on by Energy-Storage.news. Energy-Storage.news" publisher Solar Media will host ...

The DES solution also enables the batteries" stored energy to be aggregated into a virtual power plant, accessing the Nordic grids" frequency regulation ancillary services markets which have become an attractive opportunity for large-scale battery energy storage systems (BESS) with Sweden and Finland leading deployments, trailed by Denmark ...

Renewable energy has been on the rise in Finland; renewable energy accounts for 50.76% of total final energy consumption where bioenergy, hydropower and wind power were the major renewable production methods. As a result, the share of fossil fuels in the total energy supply dropped to 36%, which is significantly lower than the IEA average of 70%.

Energy-Storage.news recently heard from optimiser Capalo AI that the sector in Finland was moving to 2-hours due to changing revenues and regulations, exemplified by a 2-hour, 112.9MWh project which IPP Neoen started building in January, Finland's largest.

The project is the successor to a 30MW/30MWh BESS Neoen already operates in Finland. IPP Neoen has started construction on a 2-hour 56.4MW/112.9MWh BESS in Finland, in the context of market dynamics which optimiser Capalo AI explained to Energy-Storage.news.. The Paris-headquartered independent power producer (IPP) announced construction on the ...

Energy-Storage.news" publisher Solar Media will host the eighth annual Energy Storage Summit EU in London, 22-23 February 2023. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.

Elisa runs the radio access network (RAN) in Finland. Image: Elisa. Europe's telecommunications sector has the potential to deploy 15GWh of distributed energy storage (DES), halving its energy costs and helping the energy transition, Finnish telecoms firm Elisa said discussing its new DES solution with Energy-Storage.news.. The firm has launched a DES ...

Energy-Storage.news" publisher Solar Media will host the 8th annual Energy Storage Summit EU in London, 22-23 February 2023. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.

Finnish companies Polar Night Energy and Vatajankoski have built the world's first operational "sand battery", which provides a low-cost and low-emissions way to store ...

Finnish companies Polar Night Energy and Vatajankoski have built the world's first operational "sand battery", providing a low-cost and low-emissions way to store renewable energy.

The first commercial sand-based thermal energy storage system in the world has started operating in Finland, developed by Polar Night Energy. Polar Night Energy's system, ...

The Sand Battery is a large-scale, high-temperature thermal energy storage system that uses sand or similar materials as its storage medium. ... Subscribe to our newsletter and stay updated with our latest developments and news. Subscribe to our newsletter. Who are your clients? We serve a wide range of industries, including energy utilities ...

In terms of other drivers for energy storage, Finland is targeting carbon neutrality by 2035, while its annual electricity demand is projected to increase 20% by 2030, reaching 1TWh by that time. ... A double header of news from Sweden, with BESS developer-operator Ingrid Capacity launching what it claimed is the largest project in the Nordics ...

Decarbonize your industrial processes with our innovative thermal energy storage technology. Energy. ...

Finnish energy storage news

News. 07.03.2024. ... Finnish Polar Night Energy Successfully Closes EUR7.6m in Seed Funding to Scale Up Sand Battery Technology; 25.01.2024.

Other projects in Finland covered by Energy-Storage.news recently include a 50MW/110MWh project acquired by L& G NTR Clean Power (Europe) Fund, BESS contract wins for system integrator Merus and optimiser Capalo AI, and a BESS-hydro-PV hybrid project from developers SENS and Callio.

Almost exactly a year since the Nordic region's "largest" battery energy storage system to date was announced, Saft has said that the next system to take that crown will be a project the company will work on in Finland. Saft, the battery energy storage system (BESS) specialist fully-owned by energy major Total, emailed Energy-Storage.news ...
