Hey guys! I have a self inflicted problem I need help diagnosing. I added LED backup lights a month ago, by tapping into the Reverse light bulb wire in the tail light. All worked great until recently. I checked fuse #15 in the passenger floor board and its good. I also checked w/ a test light and have no power to the lights or bulbs.

I just picked up a 2002 Excursion that was a theft recovery from a auction. The ignition switch was beat to !@#\$ but I can turn the key to crank the motor. The fuel pump cut off switch was popped and I reset it but it still will not start. I sprayed a little starting fluid in the intake and it will start but is getting no fuel.
