(2) The Hybrid YieldCo Index consists of the Indxx Global YieldCo Index from the inception of the Fund through November 16, 2018, and the Indxx YieldCo & Renewable Energy Income Index going forward. Investing involves risk, including the possible loss of principal. Investments in smaller companies typically exhibit higher volatility.

How does a yieldco work?

A YieldCo is created when an energy company (the "parent") spins off a completed renewable energy project or number of projects that have begun producing stable cash flows. In most cases, the parent company continues to hold a majority interest in the YieldCo and sells a minority stake to public shareholders in an initial public offering.

What are yieldco assets?

These assets largely consist of solar and wind farms that have entered into long-term energy delivery contracts with customers. Many YieldCos are able to distribute a high percentage of their cash flows by utilizing tax incentives to minimize tax liabilities.
