What are the differences between the various solar panel types? Solar panels come in various types, each with distinct characteristics. Monocrystalline panels, known for their high efficiency and sleek black appearance, are ideal for limited spaces. Polycrystalline panels offer a balance of performance and cost, recognizable by their blue hue and slightly lower efficiency.

The 50 watt Grape Solar panel is 2.75 amps per hour at 18 volts. If you have an 18 amp hour glass mat battery, it would take about 6-7 hours of full sun following the sun the whole time. If you have 2 - 12 hour batteries, it would take 8 - 9 hours following the sun full time.
