This low-wattage inverter from Encocy is smart, durable (encased in a strong aluminium shell), stackable, and lightweight. Customers report that the inverter not only works as advertised (unfortunately rare on the solar inverter market), but begins to work even in low light conditions, maximising the efficiency of your solar set-up with its handy in-built MPPT controller.

String Inverters: The most common type, where panels are connected in a series, or "string," feeding into a single inverter. Ideal for solar systems with consistent sunlight. **Microinverters:** Attached to individual solar panels, they convert DC to AC right at the source, enhancing system efficiency and allowing for detailed monitoring of each panel.

The SH-RS inverters have a wide MPPT voltage operating range from 40V to 560V, while the more powerful 8 & 10KW units offer an impressive 4 MPPTs, enabling greater flexibility when designing solar arrays. The inverters are also equipped with advanced diagnostic tools, such as an IV curve scan, to identify faults or degradation issues in solar panels.
