One prominent example of cryogenic energy storage technology is liquid-air energy storage (LAES), which was proposed by E.M. Smith in 1977 [2]. The first LAES pilot plant (350 kW/2.5 MWh) was established in a collaboration between Highview Power and the University of Leeds from 2009 to 2012 [3] spite the initial conceptualization and promising applications ...

China is currently in the early stage of commercializing energy storage. As of 2017, the cumulative installed capacity of energy storage in China was 28.9 GW [5], accounting for only 1.6% of the total power generating capacity (1777 GW [6]), which is still far below the goal set by the State Grid of China (i.e., 4%-5% by 2020) [7]. Among them, Pumped Hydro Energy ...
