

# Household natural gas generators

Natural gas generators can generate electricity for your home by using your existing natural gas lines. These natural gas standby generators eliminate the need to fill a fuel tank with gasoline or install a large fuel tank near your home. Simply have the existing lines supply the fuel to your generator and never worry about fueling it up again.

1 day ago&#0183; Some home generators run on natural gas, which is typically cheaper than gasoline. Propane is a common fuel source for portable power stations, less so for whole-home options. Diesel is considered ...

Natural gas generators are popular due to the convenience of a continuous fuel supply provided from the utility grid. They're cleaner-burning and require less maintenance compared to other options.
