The cable was originally put there just to power a fuel station, but not to charge a car at such a high rate. So there it makes sense to put an energy storage system and this can then optimise the charging speeds," Van Tets said. "At the same time, once you have the storage system installed there you can also provide additional services.

However, a deeper exploration into the implications, capacities, and future outlook of these storage stations reveals a more nuanced understanding of their role in the energy ecosystem. 1.
