

# How much do solar panels cost a month

How much does a solar panel cost?

The average cost of solar in the U.S. is \$31,558, based on the latest cumulative data from the Lawrence Berkeley National Laboratory, a Department of Energy Office of Science laboratory. Solar panel costs are calculated by the price per watt. The average price per watt in the U.S. is \$3.67 for an 8.6 kW system (rounded up).

Are solar panels worth it?

Solar panels can generate major savings if you're trying to reduce your electricity costs, carbon emissions or both. The primary factor in determining whether or not solar panels are worthwhile for you is the cost you're currently paying for electricity. The higher your electricity costs, the more a solar panel system will save you in the long run.

How much energy does a solar system cost?

Before solar, this represents the average utility rate over the next 20 years, assuming annual rate hikes between 3-5% (based on location). After solar, this is essentially your lifetime energy cost divided by the total production of your system. Here's how that looks for the example system above:  $\$45,102 / 242,483 \text{ kWh} = 18.6 \text{ kWh}$

Why do solar panels cost so much?

The more solar panels you install, the higher the installation cost because the process takes more time and labor. Depending on your location, the sales tax or hourly labor wage may be greater, increasing the total solar cost. Installation is one of the many factors that determine the overall price.

How much does a solar battery cost?

The cost of solar batteries varies widely based on type and capacity. On average, a residential lithium-ion battery system, including installation, ranges from \$7,000 to \$14,000. While this represents a significant investment, the long-term savings and security benefits can make it worthwhile for many homeowners. Power Your Home With Solar
