Ice Bear 20 combines Ice Energy"s patented thermal storage technology with integrated cooling to shift your electricity usage away from high Time of Use (TOU) rate periods. When dispatched to provide cooling, it turns its compressor off and uses the stored ice, frozen during off-hour electricity rates, to cool your home for up to 8 hours ...

The latent energy storage in the ice serves as a nearly uniform temperature reservoir for heat rejection from a refrigerant that is used to both charge and discharge the ice tank. During ice charging mode, the refrigerant is circulated between the UTSS-internal compressor and the storage tank in a vapor compression cycle using the ice as the ...

Ice and Fire is a mod created by both Raptorfarian and Alexthe666, which hopes to add dragons in a proper way. Currently, Dragons have two types: Ice and Fire. Fire Dragons breathe fire and roam most of the habitable world, whilst Ice Dragons inhabit the coldest places known to man and freeze their prey to death. Both kinds of dragons spawn ...
