

IEEE power and energy technology systems journal impact factor

The journal aims at presenting important results of work in this field, whether in the form of applied research, development of new procedures or components, original application of existing knowledge or new design approaches. The scope of Electric Power Systems Research is broad, encompassing all aspects of electric power systems. The following ...

The IEEE Power and Energy Technology Systems Journal (PETS-J) is now the IEEE Open Access Journal of Power and Energy (OAJPE). The journal has a broader scope and both academic and practice-oriented articles will be published. Click here for more information about the IEEE Open Access Journal of Power and Energy (OAJPE)

The Journal of Power and Energy, Part A of the Proceedings of the Institution of Mechanical Engineers, is dedicated to publishing peer-reviewed papers of high scientific quality on all aspects of the technology of energy conversion systems. View full journal description This journal is a member of the Committee on Publication Ethics (COPE).

Aim and Scope. The IEEE Transactions On Power Systems is a research journal that publishes research related to Energy; Engineering. This journal is published by the Institute of Electrical and Electronics Engineers Inc.. The ISSN of this journal is 8858950. Based on the Scopus data, the SCImago Journal Rank (SJR) of IEEE transactions on power systems is 3.726.

IEEE Power and Energy Technology Systems Journal publishes original research papers in the field of Energy and Power Systems. The journal is intended for professors, practitioners and ...

Note: The impact score or impact index shown here is equivalent to the average number of times documents published in a journal/conference in the past two years have been cited in the current year (i.e., Cites / Doc. (2 years)). It is based on Scopus data and can be a little higher or different compared to the impact factor (IF) produced by Journal Citation Report.
