The battery modules therefore ensure superior flexibility.

their SOA. This is particularly important for large Li-Ion battery packs because: 1 Li-Ion cells are so much more unforgiving of abuse than other chemistries. 2 Large battery packs, with many cells in series, are more prone to be charged and discharged unevenly due to unbalance among cells. Li-Ion cells must not be overcharged or over-discharged.

Since we developed our first Lithium ion Batteries in 1994, we have built up a wealth of experience and know-how. As battery experts, we provide battery packs and modules with the optimal design for safety and

the cells used. We consider the way they will be used in the final product to ensure customers can utilize our Lithium ion Batteries safely.
