

Infinity solar

We are a privately-owned (solar) construction company that sells and installs photovoltaic systems for residential and commercial use. My wife, Toshia, and I founded the Company in 2015 as a telecommunications company having partnerships with Frontier Communications, AT& T, Brinks Home Security and several others.

Infinity Solar did a great job of assessing my residence for the most efficient solar panel installation. Tyler (salesperson) provided us the initial data to help setup the optimal number of panels in the best orientation, taking into consideration our monthly electricity use.
