How much does a solar inverter cost?

A solar inverter costs \$1,500 to \$3,000 total on average for a medium-sized solar-panel system installation. Solar inverter prices depend on the size and whether it's a string inverter, microinverter, or hybrid model. String inverter systems cost less up front, but systems using microinverters last longer.

Which solar inverter should I buy?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2024.

What is a solar inverter?

A solar inverter is an essential part of a solar-panel system. The inverter turns the direct current (DC) electricity generated by solar panels into the alternating current (AC) electricity needed for most appliances and home electrical needs.

Where can I find a solar inverter?

Browse solar inverters from top manufacturers on the EnergySage Buyer's Guide. To learn about other solar energy system components, visit EnergySage's solar panel and solar battery buyer's guides. Solar inverters are an essential component in any residential, commercial, or utility-scale solar energy system.

Are inverters cheap?

At around 6% of an installation's total cost, inverters aren't cheap so you need to make sure you're getting a good product before moving forward. And when you are talking with installers and receiving estimates, do some quick math to make sure all the costs add up.

How do solar inverters differ?

Solar inverters differ in several ways, including efficiency, cost, and warranty coverage. We've detailed each comparison factor below. String inverters are the cheapest and require fewer inverters for your system. Microinverters are more expensive but offer better results.
