

Can energy storage projects take part in low-carbon capacity auctions?

Energy storage projects will be eligible to take part in low-carbon capacity auctions set to be launched this month in Japan.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

Is Japan a good market for grid-scale storage?

With strong ambitions towards the energy transition and a liberalised power market structure, Japan is one of the most promising markets for grid-scale storage in Asia Pacific. The country's electricity consumption per capita is twice the Asia Pacific average, and there is a race to keep up.

How many battery energy storage projects have won a bid?

Over a gigawatt of bids from battery storage project developers have been successful in the first-ever competitive auctions for low-carbon energy capacity held in Japan. A total 1.67GW of projects won contracts, including 32 battery energy storage system (BESS) totalling 1.1GW and three pumped hydro energy storage (PHES) projects totalling 577MW.

Why is Sumitomo launching a large-scale energy storage platform?

One of the main reasons is the insufficient capacity of transmission lines. In response to this issue, Sumitomo Corporation aims to expand its business of storing energy nationwide in Japan by developing a large-scale energy storage platform that can compensate for this lack of transmission line capacity.

Is Japan's battery storage market a 'modest' market?

As has been widely covered by media including Energy-Storage.news, Japan's battery storage market has been attracting investment over the past couple of years from domestic and international entities, albeit at a growth rate which might also be called 'modest' compared to some other national markets.
