

the global temperature increase to below 2°C. Deployment of renewable energy across the globe will play an important role in the world's clean energy transition. However, it is not the only driver for renewable energy deployment. Renewable power is also now, in many places, the cheapest form of new capacity to add to the electricity system.

JAY RENEWABLE ENERGY PRIVATE LIMITED is a Private Limited Company and was incorporated on Jul 25, 2012 in India. Its corporate identification number is (CIN) U40106PN2012PTC144185 and its current status is Active.

The Government of India has laid out an ambitious target that about 50% of this power (500GW) would be generated from renewable sources, majorly contributed by solar energy amongst others. The above, supplemented by at least 34 GW of Battery Energy Storage (BES) would ensure round-the-clock renewable power availability.
