Cold energy storage technology using solid-liquid phase change materials plays a very important role. Although many studies have covered applications of cold energy storage technology and introductions of cold storage materials, there is a relatively insufficient comprehensive review in this field compared with other energy storage technologies such as ...

As representatives of TCLs, air-conditioners (ACs) hold a significant share in DR due to the following reasons: 1) ACs can store both heat and cold, exhibiting excellent energy storage capabilities; 2) ACs are transferable loads and constitute a substantial proportion of TCLs [5]. Considering the aforementioned merits, ACs demonstrate a more ...
