

What materials are used in the forklift industry?

In the forklift industry, Lithium Iron Phosphate (LFP) and Lithium Nickel Manganese Cobalt Oxide (NMC) are the most relevant materials. NMC technology is commonly used due to its high energy density and compact size. Lithium Iron Phosphate batteries are also used.

Can a forklift work with lead-acid batteries?

That depends on the task. Who uses his forklift in single-shift operation, has plenty of time to charge or change batteries and is not afraid of regular maintenance, will still be able to work well with conventional lead-acid batteries for some time.

Are Linde electric forklifts worth it?

Crucial players are Linde electric forklifts, which prove their worth every day in the race against time - lately also equipped with Linde lithium-ion batteries. For decades now, Linde forklift trucks have been distinguished by their design, for which the honor goes to none other than Porsche Engineering.

Who needs forklifts for pilsener beer?

Anyone brewing and bottling millions of hectoliters of Pilsener beer, shandy, malt beer, apple beer and other mixed beer beverages needs powerful intralogistics systems to get the drinks onto the street. C. & A. Veltins, a brewery with a rich tradition, has put its faith in forklifts from Linde Material Handling for this demanding role.
