Yes, a laptop can be used without a lithium-ion battery. Most laptops can be used with the battery in place or while plugged into an outside power source, like a wall outlet or a laptop charging pad. When a laptop is connected to an external power source, it draws power from that source instead of the battery.

There are mainly two types of lithium batteries: lithium-ion and polymer batteries. The lithium-ion battery is rechargeable and used in multiple portable devices. The laptops also use a lithium-ion battery. The lithium ion moves between electrodes to provide charge for the battery. The lithium polymer battery, however, is not rechargeable.
