

Lightsource bp renewable energy investments limited

Lightsource bp is on a mission to become a global leader in onshore renewables, anchored by our proven track record in solar development. We work with utilities, businesses, local communities and governments to help meet the rising demand for affordable, reliable and sustainable energy.

As a leading global solar developer and bp partner, we are rapidly scaling-up to help meet the rising demand for reliable electricity, while supporting the global energy transition to net zero.

In 2024, bp fully acquired Lightsource bp, doubling its investment in us. We continue to innovate, invest, and push boundaries to drive the energy transition, aiming to become a global leader in onshore renewables.

An end-to-end approach to utility-scale renewable energy and storage. We integrate in-house development, asset financing, and operational management to optimize competitiveness and capture maximum value throughout the lifecycle of each renewable energy project.

Solar power for our world. Our utility scale solar projects provide utilities, businesses and local communities with affordable and sustainable power. These solar projects help decarbonise energy systems, and provide security of supply.

We work to safely deliver affordable, reliable, large-scale onshore renewable and energy storage solutions to help the world decarbonise. Our growing business is constantly innovating and investing to help drive the energy transition.
