

Yes, battery-powered lawn mowers do last. The lifespan of a battery-powered lawn mower depends on the type of battery it uses. Lawn mowers that use a 6 or 12-volt lead-acid battery should last about 3 to 4 years with proper care, whereas those with lithium-ion batteries can typically be expected to function for up to 5 years or 500 charging cycles.

Lithium-ion batteries handle cold temperatures - down to 14 degrees Fahrenheit - better than warm temperatures. Extended time in a temperature above 85 degrees Fahrenheit can harm the battery's performance. Stihl says to not place the battery indirect sunlight or store it inside a vehicle in hot weather. ... Electric lawn mowers, like any ...
