

Battery recycling giant Ecobat is building its first lithium-ion battery recycling facility in North America - its third li-ion battery recycling facility globally. It's a huge international...

Lithium-ion batteries are hazardous waste if they're discarded, but they're a valuable resource if they're recycled. Because they're hazardous, some states legally require battery recycling.

When completed, it will be the largest lithium-ion battery-recycling plant in North America. The plant will have an eventual capacity of 25 metric kilotons of input material, recovering 95 percent ...

1 day ago; As part of the Biden-Harris Administration's Investing in America agenda, the U.S. Department of Energy (DOE) today announced the closing of a \$475 million loan (\$445 million of principal and \$30 million of capitalized interest) to Li-Cycle U.S. Inc. (Li-Cycle).The loan will help finance the construction of a first-of-its-kind lithium-ion battery resource recovery facility in ...

Unlike other battery recycling companies, Battery Resourcers offers a fundamentally new approach to lithium-ion battery manufacturing, starting with a mixed stream of used lithium-ion...

30,000-metric-ton-per-year facility in Covington, Georgia will be North America's single largest battery recycling operation to extract lithium, cobalt and nickel from discarded lithium-ion batteries and scrap.

Achievement marks capabilities of the company's internally-developed, first-of-kind, commercial-scale battery recycling technologies for recovery of battery materials with high yields, low cost, and a low environmental footprint.

We are able to safely receive and recycle all types of lithium-ion batteries regardless of form factor and state of charge, as well as all types of battery manufacturing scrap. We can also process damaged, defective or recalled batteries.
