

# Lithium Ir44 battery

Who makes LR44 batteries?

The LR44 is a very common battery and is produced by many large brands such as Toshiba, Maxell, Energizer, and more. The LR44 battery is also widely produced by smaller companies and private label battery manufacturers, for example Tianqiu produces the LR44 [Click Here To View LR44 Batteries From Microbattery.com](#)

What are LR44 batteries used for?

LR44 batteries are small, circular, alkaline manganese batteries that can only be used once. Their coin-like form qualifies them as "button cells". They have a diameter of 11.6 millimeters and a height of 5.4 millimeters, making them suitable for charging small electrical gadgets.

How much does a 15 LR44 battery cost?

AmVolt- Pack of 15 LR44 Batteries AG13A76 Battery, Premium Alkaline Ultra Power Non Rechargeable Button Battery, 1.5 Volt Small Batteries for Remotes Games Controllers Toys & Electronic Devices 4.6 out of 5 stars 29,995 \$5.99 \$5.99 (\$0.40/Count) List: \$11.99 \$11.99 \$5.39 with Subscribe & Save discount

How much does an Energizer LR44 battery cost?

Energizer LR44 1.5V Button Cell Battery x 6 Batteries 4.6 out of 5 stars 12,845 \$8.30 \$8.30 (\$1.38/Count) FREE delivery Fri, Sep 29 on \$25 of items shipped by Amazon Only 12 left in stock - order soon. POWEROWL High Capacity LR44 Batteries 40 Pack, L1154F AG13 357 303 SR44 A76 Premium Alkaline Battery 1.5V Button Coin Cell Batteries

What is a good replacement for LR44 battery?

Direct replacements for LR44 would be Duracell 76A, Energizer A76, and AG13 batteries. These batteries are exact equivalents for the LR44 battery, the only difference being the name. These batteries can all be interchanged.

What is the difference between LR44 and SR44 batteries?

LR44 and SR44 batteries are fairly similar and frequently used interchangeably. They have the same dimensions (11.6mm x 5.4mm) and voltage (1.5V). The fundamental difference is in their chemistry. Silver oxide batteries have a longer shelf life and operate better in harsh temperatures than alkaline manganese batteries.

The LR44 battery is of the alkaline type category, with equivalent batteries being A76, AG13, G13, LR1154, L1154, 154, etc. ... Yes. Avoid mixing chemistries. Lithium button batteries react when different sizes are combined or when mixing chemistries, leading to overload and bursting. [Share](#). [Previous article](#) [Next article](#).

An LR44 battery equivalent refers to a battery that is compatible with LR44 batteries and can be used as a replacement. LR44 batteries are commonly used in a variety of devices, such as watches, calculators, toys, and small electronics.

2 days ago; LR44 batteries, also known as AG13, A76, or 357 batteries, are small button cell batteries commonly used in various electronic devices. These batteries are classified as ...

Coin-shaped SR44SW, SR44, and LR44 batteries power a wide variety of portable electronics. It's important to remember, though, that they don't all have the same proportions. The SR44SW battery is a tad bigger than the SR44 battery, while the LR44 battery is even bigger. Voltage Differences. The battery's voltage is also critical to think ...

## Lithium Ir44 battery

PGSONIC 50 Pack LR44 Batteries, 1.5 Volt Alkaline Button Cell Batteries with Long Lasting Power Amazon Basics 12-Pack AA Alkaline Batteries, 1.5 Volt, Long Lasting Power Amazon Basics 10-Pack CR2032 Lithium Coin Cell Battery, Compatible with AirTag, 3 Volt, Long Lasting Power, Mercury-Free

It is one of the most used button cells. The LR44 battery has an operating temperature ranging from 0°C- 60°C, while the optimal temperature is 20°C. Dimensions and Weight of LR44 Battery. LR44 batteries (11.6 mm x 5.4 mm) have a nominal diameter of 11.6 millimeters. The overall height is 5.4 millimeters. Its weight is only 1.96 grams (0. ...

In contrast, lithium batteries use lithium metal as their anode, while LR44 batteries use zinc and manganese oxide to generate power. Voltage: The charge level of lithium batteries is higher than the charge level of alkaline batteries (voltage of 1.75 or more than 1.5V in LR44).

The main difference between LR44 batteries and other similar sizes is the type of chemistry used in the battery. LR44 batteries use alkaline chemistry, while other similar sizes may use zinc-air, lithium, silver oxide, or other chemistries. The type of chemistry affects the voltage output, shelf life, and cost of the battery. LR44 batteries ...

Chemistry: LR44 batteries are primarily alkaline manganese batteries that strike an excellent mix between performance and cost-effectiveness. 357 batteries can have a variety of chemistries, such as alkaline manganese, zinc-air, or lithium.
