## Local lithium battery disposal

Where should lithium batteries be disposed of?

Do not place the waste lithium batteries in the household trash or in curbside recycling bins. Instead, EPA recommends that all household lithium batteries be dropped off at battery collection sites(e.g., often located at electronics retailers) or household hazardous waste collection facilities for proper management.

#### Where can I drop off a used lithium ion battery?

Instead,EPA recommends that all household lithium batteries be dropped off at battery collection sites(e.g.,often located at electronics retailers) or household hazardous waste collection facilities for proper management. The EPA Used Lithium-Ion Batteries web page offers resources to find a battery recycling location near you.

#### Can lithium ion batteries be recycled?

Lithium-ion batteries and devices containing these batteries should NOT go in household garbage or recycling bins. Lithium-ion batteries SHOULD be taken to separate recycling or household hazardous waste collection points. To prevent fires, tape battery terminals and/or place lithium-ion batteries in separate plastic bags.

#### How do you dispose of batteries?

You must take batteries to an authorized recycling center, a universal waste handler or a household hazardous waste disposal facility. When you know how to dispose of batteries, you can help the environment. Dropoff sites typically accept rechargeable batteries for recycling. For single-use batteries, you can get a mail-order recycling kit.

#### Are lithium-ion batteries hazardous waste?

Most lithium-ion batteries on the market are likely to meet the definition of hazardous wasteunder the Resource Conservation and Recovery Act (RCRA). Most lithium-ion batteries when discarded would likely be considered ignitable and reactive hazardous wastes (carrying the waste codes D001 and D003,respectively).

#### How do you store lithium ion batteries?

To prevent fires,tape battery terminals and/or place lithium-ion batteries in separate plastic bags. Lithium-ion (Li-ion) batteries are used in many products such as electronics,toys,wireless headphones,handheld power tools,small and large appliances, electric vehicles and electrical energy storage systems.

To recycle lithium-ion batteries, you can take them to recycling centers or drop-off locations that accept these batteries. Many electronics stores or battery retailers often have special collection points for proper battery disposal.

For more information about recycling batteries, review Take Charge - Recycle Your Batteries! - PUB2967. While most standard household batteries can be disposed with household trash, the department recommends

## Local lithium battery disposal

taking them to a permanent household hazardous waste collection facility for recycling or disposal.

Improper disposal of lithium batteries by consumers can contribute to environmental damage and public safety risks, highlighting the importance of adhering to proper disposal practices. ... Recycling Options: You can take these batteries to local recycling centers, electronics stores, and participating retail locations. Look for battery

If the batteries are physically damaged, store them in an insulated plastic bag to avoid any short-circuiting. Recycle your batteries in a local battery drop-off bin or at a recycling centre. What to avoid when recycling lithium-ion batteries: Do not throw out batteries in your regular household garbage or recycling bin.

1. Local Battery Recycling Programs. One of the most convenient and environmentally friendly ways to dispose of lithium-ion batteries is through local battery recycling programs. Many local municipalities, solid waste management agencies, and retail stores offer collection points specifically designed for battery recycling.

View presentation on best management practices for managing Lithium batteries at a recycling facility. Presentation given during GRC Webinar on Safe Handling of Batteries held on November 30, 2023. ... Check with your local auto dealer, battery retail location, or other retail outlet about recycling these batteries. When you purchase a new auto ...

Lithium Ion batteries can catch fire if disposed of incorrectly. In 2020, Boise Fire responded to a trash trailer fire at Republic Services that was caused by the improper disposal of a Lithium Ion battery. View our disposal tips video to learn how to properly dispose of batteries and keep our collection drivers and equipment safe.

It"s expensive to ship and dispose of lithium batteries because they"re dangerous, and it"s even more expensive if they"re defective. Bigger batteries can cause bigger fires, necessitating more precautions. As a result, the district can"t afford to ship the sorts of lithium batteries that power lawn mowers and e-bikes.

These batteries need to be shipped separately from other types. It is especially dangerous to ship them with Lithium batteries of any kind. During the recycling process for lead-acid batteries, they are crushed. When lithium batteries are crushed in the same container, they explode. Lithium batteries need to be recycled and cannot go into the ...

Fires at recycling facilities have been on the rise and the number 1 cause has been lithium ion batteries. ... The same recycling process applies to automotive batteries. An automotive store may accept these batteries for recycling or a local recycling contact may have other resources available to you.

The Lithium-Ion Car Battery Recycling Advisory Group (formed in response to Assembly Bill 2832 passed in 2018) was created to advise the Legislature on policies pertaining to the recovery and recycling of lithium-ion vehicle batteries sold with motor vehicles in the state. The advisory group is being led by the:
