Windows is designed to operate in two modes: user mode and system mode (kernel mode). Basically, the user

Log name system source microsoft windows kernel power

mode deals with user requests and running an application. The system mode (or kernel mode) deals with the boot sequence, privileged instructions and ...

Hi and thanks for reaching out. My name is William, I'm an Independent Advisor. I'll be happy to help you out today. The event "The kernel power manager has initiated a shutdown transition." is expected. This simply indicates the computer has entered into a shutdown phase, usually a result of pressing the power button.
