The life of the battery depends on the battery's freshness, the model of your smoke or CO alarm, and the alarm's installation environment. Replace the batteries as soon as possible if the unit starts "chirping" the low battery warning .

## Long life lithium battery smoke alarm

The special "10-year" lithium 9v batteries made for smoke alarms often don't last a full ten years (I'd hope for 7), but regular 9v lithium batteries have a shelf life of only about 3 years. That's less than the typical five years for alkalines in a battery-only ionizing alarm.

You generally cannot replace the battery, instead, replace the entire detector after its ten year life span is expired. Many detectors will make use of a 9v battery. However, some may require different types of batteries. Use high quality, long lasting batteries. Using rechargeable or low quality batteries may cause your smoke detectors to fail.

Kidde Kitchen Smoke Detector & Carbon Monoxide Detector Combo with Long-Life Lithium Battery and Smoke Detector, Long-Life Lithium Battery Powered Smoke Alarm with Hush Button - Amazon

Customers have mixed opinions about the battery life of the gas smoke fire alarm. Some mention the 10 year battery is a great plus for this one if you have high ceilings, and the long-term batteries work great. However, ...
