

Lydian is a newly established renewable energy development company specializing in the development and construction of utility-scale solar and battery energy storage system (BESS) projects in North America. Lydian owns 9 development assets, consisting of both solar and storage, with several expected to reach NTP during 2024-2025.

EXCELSIOR, Minn. - (BUSINESS WIRE) - Lydian Energy, an independent power producer specializing in the development, construction, and operation of utility-scale solar and battery energy storage projects across North America, today announced its official launch.

Lydian's proprietary, high-temperature electric reactor enables the production of the world's lowest cost e-fuels, a category of drop-in alternatives to transportation fuels made from captured CO...

US independent power producer (IPP) Lydian Energy announced on Tuesday the official launch of the company with an initial pipeline of nine solar and energy storage projects in Texas and New Mexico totalling 1.75 GW. Led by CEO Emre Ersenkal, Lydian is backed by local renewable energy infrastructure investor Excelsior Energy Capital.

Driven by a passion for doing better by our partners and planet, we have the people, relationships, and capital required to bring essential projects to exceptional ends. Emre co-founded Lydian with Excelsior Energy Capital in 2023 and serves as CEO, bringing more than 20 years of experience across energy infrastructure, investing, financing ...
