The Massachusetts SMART program is a solar incentive that provides solar homeowners with additional compensation for the solar energy they generate. The SMART program was designed to replace the state's Solar Renewable Energy Credit market to provide predictable solar savings.

With over 85,000 homes generating energy from the sun, Massachusetts is the fifth most solar-friendly state in the nation, according to the U.S. Energy Information Administration. Massachusetts offers generous rebates, tax credits and tax exemptions for solar energy and many companies have concentrated their sales efforts here.

Massachusetts residents can choose community solar for their energy. Community Solar is a shared energy program available to both homeowners and renters. Call Now to Join Your Solar Farm: 1-866-541-4177

Massachusetts solar energy project reviews

Nearly 25% of the Bay State's electricity is generated by solar--enough to power more than 777,000 homes. Even during those long, cold New England winters, there is still plenty of sunlight available to charge up solar panels, so Massachusetts solar customers will still generate energy and save money on electric bills all throughout the year.

The Solar Massachusetts Renewable Target (SMART) program hit its fifth anniversary in late 2023, and the state has launched a review to determine how to adapt the system to current economic realities and environmental priorities. ... In 2021, the state's new solar installations topped 600 megawatts, according to data from the Solar Energy ...

This solar initiative reflects the agency's desire to reduce greenhouse gas emissions by promoting renewable energy generation. Our goal is to create energy savings by procuring electricity at a favorable rate, generate revenue by using unused state land and also support the Commonwealth's green and clean economy.

Federal and state tax incentives lower your costs. A federal tax credit allows you to deduct up to 26% of the cost of a solar panel system from your taxes, although this percentage will decrease in 2023. 2 In Massachusetts, you can also receive 15% of the system cost as a credit against your state income tax, up to \$1,000. Additionally, Massachusetts also has no sales or property taxes ...

The Solar Massachusetts Renewable Target (SMART) Program provides per-kWh incentives to solar PV projects up to 5 MW. The program is capped at an aggregate of 1,600 MW, and incentives are available in Eversource, National Grid, and Unitil territories. The value of the incentive payment is equal to the following for standalone solar projects:

Update: Due to rising utility rates, the SMART incentive for solar-only systems is \$0/kWh in all MA territories. However, there is still value in the SMART incentive for solar systems paired with battery storage. In 2018, the Massachusetts Department of Energy Resources and the state's three largest utilities launched the Solar Massachusetts Renewable Target (SMART) ...

5 days ago· Massachusetts' Home Solar Project Sales Tax Exemption prevents you from paying the state's 6.25% sales tax on your solar panel system. This applies to any equipment directly related to any solar, wind-powered, or heat pump system used as primary or auxiliary power for a property's energy needs.

The Solar Massachusetts Renewable Target (SMART) Program is DOER's incentive program established to support the development of solar in Massachusetts. ...
