

FWT-20000 Medium frequency inverter spot welding machine (water cooled) FWT-60 Medium frequency inverter roll welding machine. ... energy storage welding machine, electronic pulse spot welding machine, microcomputer precision spot welding machine, high frequency inverter spot welding machine, resistance welding machine, battery spot welding ...

Welcome to the website 021-57638343 of bica welding equipment (Shanghai) Co., Ltd. Medium frequency spot welder series; General spot welder series; Energy storage spot welder series; Precision inverter welding machine; Spot welder accessories series; Stud welding machine series;

During welding, the workpieces are pressed between two electrodes, and a current is applied for a certain time. ... power frequency (50/60 Hz), medium frequency (150-8000 Hz), and high frequency (10-500 kHz). According to the different generation mode, pulse current is divided into capacitance energy storage and direct current shock wave ...

The company's products, such as three-dimensional automatic argon arc welding machine, motor rotor welding machine, numerical control flash butt welding machine, medium. frequency inverter resistance welding machine, high-power energy storage welding machine, robot welding tongs, and non-standard automatic welding machine, are widely used in ...

Tianjin Sunke Digital Control Technology Co., LTD It is a high-tech enterprise specializing in R & D, manufacturing, sales and engineering services of resistance welding controller, transformer, precision welding, laser power supply and non-standard laser workstation products. It has more than 30 years of history and experience, and has formed a business system of providing ...

Reduce operating costs, including energy savings each and every point of welding as well as shortening the welding cycle. Save energy :especially suitable for welding thick workpieces and high-conductivity metal ch as aluminum and galvanized steel sheet.etc.

Medium Frequency Welding System Composition Welding Controller, transformer, and welding work piece. Welding controller includes the controlled rectifier, energy storage part, IGBT, power driving and central control part.

Depending on the usage scenario and welding objects, spot welding machines are further divided into medium frequency spot welding machines, precision spot welding machines, and energy storage spot welding machines. Due to its high welding efficiency and ease of automation, the application of spot welding machines is becoming increasingly ...

Machine Features: o The intermediate frequency inverter welding power source is adopted to effectively reduce energy consumption and welding spatter, and the quality of welding is stable and reliable. o The welding torch can be designed as a horizontal or vertical structure, and it is easy to extend to the deep part of the box for welding, so as to meet the welding requirements ...

Welding diodes are designed for medium and high frequency welding equipment and optimized for high current rectifiers. The on-state voltage is very low and the output current is high. Hitachi Energy is selling both normal housed and housing-less welding diodes. The latter is becoming more and more important in high current welding applications for joining of high refractory ...

Medium Frequency DC Machine has Medium Frequency Inverter DC Resistance Welding Control System which through the rectifier circuit transfer the three-phase alternating current to direct current, and high quality, high efficiency, 98% power factor, three-phase input load balancing, time control precision is 1ms; Saving energy.

This work deeply explored differences between single-phase AC resistance spot welding (RSW) and three phase medium frequency DC RSW systems. The main difference between the two ...

car beam cnc dc medium frequency Energy storage welding machine. 1 set (Min.Order) \$10,000.00 - \$12,000.00 / set. metal sheet metal hanging automobile connecting rod Energy storage welding machine. 1 set (Min.Order) \$10,000.00 - \$12,000.00 / set.

01 Auto parts manufacturing industry In the auto parts manufacturing industry, Henglong has designed and manufactured a full series of welding equipment for auto parts by using medium voltage capacitor energy storage and medium frequency DC welding technology, which are widely used in automobile seats, car doors, front and rear bumper, punching welding parts welding, ...
