Net dependable capacity is the amount of power a dam can produce on an average day minus the electricity used by the dam itself. The reservoir provides nearly 193 miles of shoreline and 5,470 acres of water surface for recreation. Melton Hill is the only dam in the tributary reservoir system with a navigation lock.

During our 40-year relationship with Melton doing projects as large as Exxon Mobil Campus, 5 million sq ft, the Anadarko Projects, 1.5 million sq ft, and as small as 2-story VBA project for the VA, Melton Electric always delivered great quality, great service, excellent people on our projects.
