Should you buy a portable jump starter?

If the car battery is old and won't hold a charge, a jump kickstarts the engine so you can drive to an auto store for a replacement. Ahead, we recommend the best portable jump starters and provide advice on what to look for while you shop. Thankfully, portable jump starters are quite simple to compare to one another.

What is the best jump starter for a diesel truck?

If you are only looking for a jump starter that provides one or maybe two emergency jumps per charge, go with the NOCO Boost Plus GB40. This device does not have the super long-lasting life of the larger models, and it does not have the high amperage required to start a massive diesel truck, but for most people, it gets the job done.

What are the different types of car jump starters?

There are two basic types of car jump starters: portable jump starters and portable power stations. Portable jump starters are small and easy to store in your trunk (or even glovebox), while portable power stations can be kept in the garage for repeated use. The question of which kind you need depends on how you'll be using it.
