

# Mothership solar system

Could an alien mothership be in the Solar System?

A draft paper by a Harvard scientist and the head of the Pentagon's UFO office has raised the idea an alien mothership could be in the solar system, sending out tiny probes dubbed 'dandelion seeds' to explore the planets within. Could extraterrestrial motherships visit planets in our Solar System?

There is a possibility that extraterrestrial motherships and smaller probes may be visiting planets in our solar system, the head of the Pentagon's unidentified aerial phenomena research office noted in a report draft shared Tuesday.

Could recent objects be alien probes from a mothership sent to study Earth?

M. Kornmesser/NASA The official in charge of a secretive Pentagon effort to investigate unexplained aerial incursions has co-authored an academic paper that presents an out-of-this-world theory: Recent objects could actually be alien probes from a mothership sent to study Earth.

Could a mothership send a 'dandelion seed' to Earth?

It proposes that an alien mothership in the solar system could send probes to our planet that could land just like "dandelion seeds," where they "parachute" while entering our atmosphere to slow down so that they don't burn up on entry. Such probes could use starlight to "charge their batteries" or even use liquid water as fuel.

Should we look for evidence of transmissions from our Solar System?

In a recent study, two researchers from the University of Liège and the Massachusetts Institute of Technology (MIT) recommend that we look for evidence of transmissions from our solar system.

US Pentagon Gives A Nod To UFOs, Director Says Alien Mothership Could Be In Our Solar System Last week, the Pentagon's unidentified aerial phenomena research office noted in a report that there is a possibility that extraterrestrial life and airships may be visiting our solar system. Sejal Jakhwal Updated: Mar 14, 2023, 19:29 IST.

A Harvard scientist and a Pentagon official have authored a research article that suggests the possibility that there could be an alien mothership in our solar system, sending ...

Unlike Solar system asteroids or comets, "Oumuamua appeared to have an extreme flat shape and was pushed away from the Sun without showing a cometary tail of gas and dust, raising the possibility that it was thin and artificial in origin. Three years later, Pan-STARRS discovered a definitely artificial object, namely NASA's

Pentagon officials said in a draft document last week that aliens could be visiting our solar system and
