

How can storage help decarbonise the EU energy system?

Analysis has shown that storage is key to decarbonising the EU energy system. By allowing excess electricity to be saved in large quantities and used later when it is needed, it increases a better penetration of renewable energy in the power system.

Should energy storage be included in network charges and tariff schemes?

In concrete terms, the Commission is recommending EU countries to consider the specific characteristics of energy storage when designing network charges and tariff schemes and to facilitate permit granting. The Commission also encourages further exploiting the potential of energy storage in the design and operation of the networks.

How do energy storage technologies contribute to the decarbonisation of the economy?

Finally, energy storage technologies facilitate the electrification of different economic sectors, notably buildings and transport. For example, beyond the electricity system, thermal storage can contribute to the decarbonisation of the heating and cooling sectors.

Should energy storage be utilised in the design and operation of networks?

The Commission also encourages further exploiting the potential of energy storage in the design and operation of the networks. Some recommendations also address challenges related to a need for long-term visibility and predictability of revenues to facilitate access to finance (for example monetising services provided).

At the end of 2018, China's operating energy storage capacity accumulated to 31.2 GW, including 30.0 GW pumped hydro, 1.01 GW electrochemical energy storage and 0.22 GW molten salt ...

The goal of having a solution to the issue of energy storage within the next 18-24 months, so that green energy is not rejected, was set by the Minister of Energy, Commerce and Industry, ...

In a letter to Parliament, Energy Minister George Papanastasiou emphasizes the promotion of central and hybrid storage facilities under the "Photovoltaics for All" program. ...

The goal of having a solution to the issue of energy storage within the next 18-24 months, so that green energy is not rejected, was set by the Minister of Energy, Commerce ...
