

Oku solar panels

What is Oku solar heating?

Oku solar panels are especially designed for this application. This is what Oku solar heating provides: maximum efficiency and the right temperature for your swimming-pool. Enjoy a warm and comfortable pool temperature with Oku solar heating.

Do Oku panels use a lot of energy?

Oku panels require lower pump powers hence if you're changing your system over to Oku panels from strips, your existing pump may use more energy than is required. If you're purchasing a new pump make sure it's specifically suited for solar pool heating systems, as pool filter pumps are geared differently.

How do Oku solar panels work?

The water of the swimming pool can flow through the Oku solar panels in either direction, so they can be mounted both lengthwise and side by side. The individual rows of panels are connected on a Tichelmann principle (same routes for each row). It is not advisable to connect more than seven panels in series.

Why should you choose Oku solar panels?

Oku solar panels, made of high density polyethylene, offer the right foundation for operating such installations. low pressure loss, high efficiency, non-corroding resistant to swimming pool water absolutely frost-proof, produced in one piece resistant to animal bite marks supports human weight simple to install - modular system
